

CEARC

Cultures•Environments
Arctic•Representations•Climate

Uummannaq is one of the 7 sites worldwide and UPI is the Greenland partner of the international research programme ARTisticc (funded by Belmont Forum). This programme is designed to study environmental changes and experiment collaboration between scientists and artists. It is coordinated by the research center CEARC (Cultures, Environments, Arctic, Representations, Climate) of the University of Versailles Saint-Quentin-en-Yvelines. The first fieldwork was October 2014 and the next one will be in April 2015.
